

TECHSOLV HP

High Performance Degreasing Solvent for Mechanical and Electrical Equipment

WWW.MECATECH-PERFORMANCES.COM

DATA

TE

DEFINITION

- ◆ TECHSOLV HP is a combination of high performance degreasing fluids with fast evaporation rate and good solvent power.
- ◆ This product is especially adapted for cleaning and degreasing mechanical part and tensionless electrical equipment.
- ◆ It is compatible with all materials : metals, plastics, insulation resins and varnishes or paints.
- ◆ TEKSOLV HP removes greases, oils, tar, water, moisture, and sludge.
- ◆ TEKSOLV HP is also suitable for spray cleaning of brakes pads, clutches and allows degreasing of mechanical parts before painting or surface treatment.

ADVANTAGES

- ◆ Formulated without chlorinated solvent.
- ◆ Very good wettability of surfaces.
- ◆ Specific formulation avoids any risk of stains (including on copper based alloys), and has no effect on plastic films, protective coatings or lubricants (PTFE).
- ◆ Rapid evaporation (about 1 minute at 20 ° C). Leaves no residue.

HOW TO USE

- ♦ If necessary, switch off the equipment and installations and apply it to the surfaces to be cleaned by spraying or brushing. Possibly, wipe immediately with a cloth.
- ♦ Allow to evaporate completely before turning on the power.
- ♦ On fragile plastics, it is advisable to make a localized test to check the compatibility.

CARACTERISTICS

♦ Aspect	Clear
♦ Colour	Colourless
♦ Odour	Specific
♦ KB value	200
♦ Specific mass at 15°C	730 kg/m ³
♦ Flash point closed vessel	-14.5°C
♦ Copper blade corrosion	1a

PACKAGING

- ♦ Packaging: Aerosol of 650/400ml in boxes of 12
- ♦ Article number: 404012
