

HOP OIL

Lubricating oil for pneumatic tools

VERSION 1 - SEPTEMBER 2022

WWW.MECATECH-PERFORMANCES.COM

DESCRIPTION

- High performances Lubricating Oil for Pneumatic Tools t under heavy load.
- The presence of GDA® Technology Modified Silicones associated to the EP additives gives very high anti-wear and anti-seizing properties (helical grooves, ratchets...).
- Good adhesion ensuring the persistence of the film and enabling to reinforce the anti-wear and extreme pressure properties.
- Excellent thermic stability and good anticorrosion properties, absence of corrosion on ferrous, non-ferrous metals and on alloys. Protects the material during storages and in case of high moisture.
- Emulsifies water: Forms with condensation water stable emulsions and thus prevents water to wet and corrode surfaces.

APPLICATIONS

- All types of pneumatic material: sanders, rigs, drills, hammer drills, slaughtering hammers, electric screwdrivers, pneumatic pumps, manual recoil starter for diesel engines ...
- In normal conditions of use, HOP oil presents is no way toxic and and requires for its handling only the general precautions applying to the industrials lubricants.

SAFETY DATA

- Consult the SDS of the products available on our website www.mecatech-performances.com. Professional use.

PACKAGING

- 1 litre-cans.
- REF : 680001
