COUPE 3 C

CUTTING OIL, ALL METALS, NEW GENERATION

GDA® TECHNOLOGY MODIFIED SILICONE

VERSION 2 - JAN 2022
WWW.MECATECH-PERFORMANCES.COM

USAGE

- All machining requiring a high performance neat cutting oil : deep-hole drilling, broaching, grinding, tapping.
- Suitable for all metals, light alloys, steel extra hard, stainless steel.

PROPERTIES

- Because of its formulation, mineral oil reinforced with GDA® modified silicones, Coupe 3C oil has a very high lubricity (EP lubrication).
- Coupe 3C oil reduces tools' wear, thereby reducing the frequency of tools' sharpening.
- The surface finish is improved reducing the need of special finishing.
- The affinity of modified silicones to metal surfaces prevents sticking of the metal chips to the tool, to make possible good machining speed and thus improving performances.
- Formulation guaranteed without Chlorinated paraffin.

HOW to USE

- Shake well the spray before use.
- Spray on the tool/part interface to lubricate

PRECAUTIONS FOR USE

- In the normal conditions of use oil Coupe 3C does not present any character of toxicity and only requires general precautions applying to industrial lubricants and aerosols.

PACKAGING

- Spray 520 ml nominal capacity (volume net 400 ml).
- Box of 12 Sprays.
- Art. Number 475012.
